Not if I touch you
Not if I kiss you
Not if I open my hand like we need to be
Oh girl I know it's been a minute you have been waiting
And you know our waiting is due
So what you wanna do with me
All I wanna do is please you
And tease you... your body even more
So what are you waiting for
Oh baby can I take you...
There is so many ways that I want to make love to you
And your body... sexy things we're gonna do
There is so many ways that I want to make love to you
Do you mind if I stay the night
I don't wanna leave you baby
I wanna stay around and lay it down
Over and over again
Your body keeps talking to me
And I like what is saying girl when we are playing
There is so many ways that I want to make love to you
And your body... sexy things we're gonna do
There is so many ways that I want to make love to you
Do you mind if I stay the night
