When you're feeling low  
Hypodermic's where you go  
When you're with yourself  
You wish you could be someone else  
Can't you see like you saw anymore?  
Can't you feel like you felt like before?  
Can't you face anything anymore?  
When life's a waste, run away  
Your life's a waste, run away, run away

Once you get a ride  
Doesn't matter where you lay  
Once you shoot it in?  
Doesn't matter who you've been  
Can't you see like you saw anymore?  
Can't you feel like you felt like before?  
Can't you face anything anymore?  
When life's a waste, run away  
Your life's a waste, run away, run away

Are you're reaching in but you don't know where to  
begin?  
All your dance and song won't matter when you're  
gone  
Can't you see like you saw anymore?  
Can't you feel like you felt like before?  
Can't you face anything anymore?  
When life's a waste, run away  
Your life's a waste, run away, run away, run away, run  
away, run away
