In your plane int he blue sky
you roam again
words that echo in your mind
make your heart beat faster
this is no vietnam
we will win in Iraq

The president said said, "let it ride"
islam be damned
make your last stand
in Baghdad

Warrior, the time bomb's about to go
what will you feel
will you ever wonder
if that man that's in your sights
ever kissed his girlfriend goodbye
the captain said, "kill or die"
islam be damned
make your last stand
in Baghdad

Great satan, our flags are burning

Now america has fond its young men
in the sand
where their casualty
is just another number
in iraq

the president said, "let it ride"
you will be damned
make your last stand
in Baghdad!
