Her red lips
Is talking to your face
Just one kiss
And she'll take you to your place
Like a spell
You're wrapped round her finger
Lost your track
No way you can turn back now

Crash and burn
She'll break you
There's no way out from here

This jealousy is killing me
You're the reason I can't sleep
I just wish I had you closer
Much closer

Now she's laying on your chest
Soon she'll take off her red dress
You pull her in and you come closer
Much closer

Her green eyes
Is telling a story
Hypnotized
She says baby don't worry

Crash and burn
She'll break you
Do you remember me

This jealousy is killing me
You're the reason I can't sleep
I just wish I had you closer
Much closer

Now she's laying on your chest
Soon she'll take off her red dress
You pull her in and you come closer
Much closer

She touch your face
And taste your mouth
But do you think of me right now
Lesson learned and now I'm burned

This jealousy is killing me
You're the reason I can't sleep
I just wish I had you closer
Much closer

Now she's laying on your chest
Soon she'll take off her red dress
You pull her in and you come closer
Much closer
