

It's somewhat Humanoid! "Polar Bear Hugz"

It gets lonely where the polar bears play
That's why winter's here
To bring Christmas our way
Drags her long white dress across
Dry summer fields
Her frosty kiss will bring us all together
So bundle up my dear
And may my warm kisses
Be the firelight by which we'll lay forever
In that little town of Bethlehem
Where baby Jesus lay
Was there snow? We'll never know
didn't come with flakes of cloud
He brought the gray world hope
on this Christmas night let us get together
(merry Christmas darlin')
(I hope it will be good)
(with me right here beside you)
