I discovered so much from my last trance  
Dogs running in black & white,  
Don't make me process this much information  
It's unforgivable

Aging apocalyptic ecstasy, previous life laughter  
My background is such an affliction,  
My psychic told me  
My transients exploited vacant energy fields  
They are poisoning us from the skies

Even this ghetto world that has nothing doesn't want  
me [x2]

Clone tissue and the crow instabilities are lovely  
Its power on me is bloody breastfeeding horrid  
discovering instabilities  
They're killing us from the skies

Even this ghetto world that has nothing doesn't want  
me [x3]
