

Jajoe "Ordinary World"

Visit "[Ordinary World](#)" on MotoLyrics.com

I'd give my all to be with you
On our blanket next to mars
satellites and shooting stars,
With every breathe I share with you
Standing next to me
I'll be right there next to you
Shinning together like jewels on a clown
in this ordinary World
Where living forever is being profound
In this ordinary world
And if you fall
I'll be there to catch you
In the spaceship we are free
By the neon galaxy
With every breathe I share with you
feeds blood to my heart
on our shuttle to the moon
Shinning together like jewels on a clown
in this ordinary World
Where living forever is being profound
In this ordinary world
The dreamers starve and wave goodbye
to someones shoulder
For something better
Shinning together like jewels on a clown
in this ordinary World
Where living forever is being profound
In this ordinary world
There's a place right next to mars
Satellites and shooting stars
"Hey kids lets go"
Shinning together like jewels on a clown
in this ordinary World
Where living forever is being profound
In this ordinary world
