Hello mister with thoughts on your mind
Hello lady take the fruit from the vine
Taunts to lies these words of mine
They ruin lives

Hello charmer,
Now you know your bare
You shouldn't even care
You shouldn't even dare to seek
In those places you cannot reach
But curiosity controls
The body when you have everything to lose
For you and you
And you and you and you!
Have no fear for the serpent is listening
For lust you trust to keep me close
I'm giving you everything you've ever wanted
By taking away your holy soul

I'm venom-less, but ill constrict you my precious prey.

Were in the garden making love
I'm so alive
Were In the garden making love
We're so alive
