Let all those love now
Who were never lovers before
Let those who always love somebody
Love somebody more
When is the spaceman coming down
Unbend your mind

Her voice said there's nothing to fear
We are here because we are here
Waiting for the spark to fall in from the heavens

Waiting for the chance is near
Wind blowing through her flowing hair
Unbend your mind

All for love and nothing more
All for love and nothing for
Live only life by selling things
Live only love by selling things
