There's still time if you're gonna  
Still time if you choose to try  
Right now the moment's upon ya  
Don't let this one pass you by  
All you can be is here and true  
Just call it forth  
And you'll see it work for you.

(There's) still time for beginnings  
Still time for brand new day  
A brand new passion for living  
What a difference perspective makes  
Every choice has brought you here  
And every choice will take you farther still, it's  
Clear

#### **CHORUS**

'Cause if it matters to you  
There's no mountain you won't climb  
No tome that you won't do  
When it matters to you  
You'll BE then Do all you can do

Don't forget where you're goin'  
Don't forget where you're coming from  
It's a process of knowing  
Step by step the wisdom comes  
The only real mistake is when  
We don't learn and make that same mistake again

It's not tome to give up now  
It's the time to make your own breaks  
The whole world's waitin' upon ya  
There's such a difference you can make  
Living dreams don't fade to gray  
(So) Live your dreams  
Have faith that you will find a way

**REPEAT CHORUS TWICE**
