

## Oi Polloi "Thin Green Line"

Visit "[Thin Green Line](#)" on [MotoLyrics.com](https://MotoLyrics.com)

So here we are - a thin green line  
Into the nineties, runnig out of time  
Extinction of our planet has already begun but don't let  
them tell you nothing can be done  
Some of us are angry & fighting back  
Non-violent direct action is a means of attack  
No, we're not giving up without a fight  
No nuclar plant here - we're going to trash the site

Gotta be honest, gotta be blunt  
If we really want to stop them we've got sab the hunt  
Smash that bulldozer, watch the flames go higher  
Pull the plug & cut the wire  
We get beaten up & send to jail  
But I don't care if that's what it takes to save the wales  
Save our Earth, save the wilderness land  
Are you for us or againts us? Time to make your stand  
See that whaling vessel sinking into brine  
Taken out by a limpet mine  
See those trees standing so tall They've been spiked so  
they won't fall  
See that excavator going up in smoke  
Sugar in the petrol tank - that's no joke  
Ecosabotage in the dead of night  
Like mushrooms break through concrete in the  
moonlight
