

John Martin "Just Drive"

Visit "[Just Drive](#)" on MotoLyrics.com

The night falls on the highway
Black skies closing in
I just can't break the silence
Don't know where to begin
Your face in the review mirror
My hands on the steering wheel
80 miles an hour
We're still standing still

To who do we pray
Who can help us now?
We can pray
We can escape the night
We just drive
And just drive

We see ghost towns through the window
Hear the news on the radio
They're talking bout' the girl from deadwood creak
They're not searching anymore
I remember every word in every summer song
And dancing with fireflies
80 miles an hour
We can't turn back now

To who can we pray
Who can help us now?
We can pray
We can escape the night
We just drive
And just drive
