well im trying to find a better way  
well im trying to find a way to explain but i  
cant explain why  
ive been feeling nothing

and lately my head's been  
quite a mess and my existence seems  
rather pointless but i know if i  
give it a chance it'll be fine

still everything is disappointing  
and life's lessons all take too long  
and im defensive and senseless  
all the rest is numb

well im trying to get my (self) ass outta bed  
but its so hard when theres no sunshine overhead  
because ive been living in a basement  
with green carpet guess thats what i get

still everything is disappointing  
and lifes lessons all take too long  
well im defensive and senseless  
all the rest is numb

ba da ba ba ba da ba.....ect
