Baby what's become of us
So deeply lost in love
Have all the distractions
Taken what it was

Make me feel like a woman
With the touch of your hand
Say it's me and only me
That makes you glad to be a man

Baby it seems so long
Since we had some time alone
All the obligations
And that stupid ringin' phone

Make me feel like a woman
With the touch of your hand
Say it's me and only me
That makes you glad to be a man

So tell me when you see me
In that black low-cut gown
Am I still the woman
That turns your world around

Make me feel like a woman
With the touch of your hand
Say it's me and only me
That makes you glad to be a man

Make me feel like a woman
