#### Verse 1

I still remember you and your sweet tender nights...  
Could it be untrue ? all the stars in your eyes?...  
I still remember you & the poems you read for me  
Watching the clouds fly above

#### Chorus:

Love is said to cure a broken heart  
To mend, to heal, to glue the pieces back in time  
Together as new, better than new  
Love is said to comfort a morning soul  
Undo the pain & sorrow  
Love is the key to the music of soul  
Love plays back all the right notes

#### Verse 2

I still remember you and your sweet love song you  
played/sang for me  
It could not have been false ? I heard the perfect  
harmony...  
In every note you played, in every love we made  
I still hear your heart beating with mine
