(verse1)

When you first open your eyes
don't be afraid I'm here to guide
in a world of vampire light
with me you'll live eternal night
I seek you out through the light of night
searching for my darkness bride
when I see that beauty's eyes
no longer alone will I hide

(chorus)

Let the sunlight cease to shine
in this vampire sight
sunrise beauty once was mine
now I'm seeing only night
in this vampire sight

(verse2)

I take you in my arms so white
your flesh burns mine with it's blood heat
razor kiss suck out past life
give you death life with my heart beat
I know you love the dark night life
I see it shining in your eyes
if you would come and be my bride
night will be yours all the time

(chorus)

(solo)

(chorus)
