Why don't you buy the music of the bands you like?  
Why do you try to sneak into the gig?  
Do you really think all the bands are rich?  
Maybe you don't understand some things  
Most punk rock bands are struggling to survive,  
Before they play have a lots of miles to drive  
Work hard every day for their passion and love,  
And success is just a dream

Let's go  
United we stand, divided we fall  
Punks & skins united forever

Once upon a time there were more record stores  
We had a lot of places to play  
I remember the zines do it yourself  
Who spread the word and created new generations  
But now the web has changed the world  
The bands are famous thanks to youtube  
We just would like to do what we like  
And success is just a dream

Let's go  
United we stand, divided we fall  
Punks & skins united forever
