

## Oleta Adams "Let's Stay Here"

Visit "[Let's Stay Here](#)" on MotoLyrics.com

Let's just freeze the frame, savour the moment  
Never let it fade away  
Let's just pretend there's just you and me forever  
If only for this one day  
Sipping Mojitos and listening to Miles, playing our  
favorite games  
And later we'll count all the stars in the sky;  
there's one I want to re-name

I want to feel every beat of heart  
losing myself in your arms  
I'll hold on to every kiss that you give  
And wear them like they're charms  
There's nothing important or pressing to see  
outside of where you want to be  
Settle back, relax my de----ar  
Let's just stay here

Let's just see if we have a flying dream  
In the middle of the afternoon  
You can hop aboard my shuttle, so I can take you to the  
moon  
And we'll keep soaring around and round  
To see how far we'll go  
And it's time to be homeward bound, we'll come down  
really slow

You can tell me your favorite bedtime story  
And never even say a word  
You can write a brand new song of love to a tune I've  
never heard  
The fact of the matter just happens to be  
You're the only one that matters to me  
Sit back, get closer de---ar  
Let's just stay here
