If you wanna be the man you know you gotta be
if you gotta take a chance to write then come with me
If a wave tips up you take your chance.
I sing you sing
Never show your hand and let them know your ace, a
pocketful of queens on the long home straight
If a wave tips up you take your chance
I sing you sing

This will take a long day you will find
Making tracks to make them in my mind

Whisper, know your track put it all together but I'll
take it back
Mind's filled full of waves
Gonna be a full stop a bright red cross taken time to
plan and prove this spot
Mine's filled full of waves

If you wanna be the man you know you gotta be if you
gotta take a chance to write then come with me
If a wave tips up you take your chance.
I sing you sing
Never show your hand and let them know your ace, a
pocketful of queens on the long home straight
If a wave tips up you take your chance
I sing you sing
