i can tell you're in a very awkward situation
i can tell you're waiting for someone to come and save
you
i can tell you're breaking but you're holding it together
stay here tonight, i'll stay here tonight

don't worry baby it's probably nothing
just you be safe and sound
we'll stick it out together
don't worry baby it's probably nothing
just you be safe and sound
we'll stick it out together

i know you think that you've been standing still for too
long
i can tell you're desperate to get out so you can move
on
i can see your problem but we'll work on a solution
stay here tonight, i'll stay here tonight

don't worry baby it's probably nothing
just you be safe and sound
we'll stick it out together
don't worry baby it's probably nothing
just you be safe and sound
we'll stick it out together
(together, together, together, together)

don't worry baby it's probably nothing
just you be safe and sound
we'll stick it out together
don't worry baby it's probably nothing
just you be safe and sound
we'll stick it out together
(stick it out together)
