I donâ€™t need to say I want it you donâ€™t need to  
be  
Tears are streaming down your face and running down  
the street  
I could be the waves and I know you could be the sea  
It could take forever but I know its good for me

I just want to show you where the light is  
I just want to be there, in the sun  
If youâ€™ll show me where your heart is  
I will stop & trash it, in the sun

Jess is waking in the morning trying hard to see  
Her cheekbones make me want to sing a thousand  
symphonies  
I could be the waves and I know you could be the sea  
it could take forever but I know its good for me

I just want to show you where the light is  
I just want to be there, in the sun  
If youâ€™ll show me where your heart is  
I will stop & trash it, in the sun
