Love You That Much

I love talking to you on the phone as we both  
Start drifting off to sleep  
Taking the-smiles and laughs of the greatest todays  
Into tomorrow's memories

You're my favorite crazy, baby

That's why I love you that much  
From our kiss our first date in the moonlight  
To every good, in our every good night  
To how I feel when you say that you love me  
To the warmth of the touch, when you touch me  
& To every dream when I wake up  
Is why I love you that much

Countless stars in a universe don't compare  
It could never be enough  
To here and now without a doubt  
To all that's yet to come

To every road from here to there to everywhere

That's why I love you that much  
From our kiss our first date in the moonlight  
To every good, in our every good night  
To how I feel when you say that you love me  
To the warmth of the touch, when you touch me  
& To every dream when I wake up

You've opened up my arms that wide  
I thank God you're by my side  
I can't deny, I realize, You and I  
Have become my every reason why

Guitar solo

From every road from here to there
