Time to leave the town
The people sleepin' around
Man, they wanna settle down but they are leaving it out
Because it's all drugs and money
No it ain't fuckin' funny
And if you got a hoody then you must be up to
something
The planet's getting colder
You give a man the shoulder
That's why you get me wreaking havoc with a boulder
Use imagination
And you never have to fake it
I don't go to school I felt bad, I couldn't take it
Then my skill eroded
A bill I never noticed
And it was back then I took the meds just to focus
Now it's depression
Walk out with a lesson
Every single fuckin' day, man, I vow to make a record

Now time to close
Because your minds have froze
And I'm gonna live my life in my mind, I know
That it's time for up-and-leavin'
I'm a fuckin' heathen
And that is how I leave it the world is uneven
Closing time,
One last call for alcohol
So finish your whiskey or beer
Closing time,
You don't have to go home
But you can't stay here

Not a sad story
But it's tad boring
I'm sorry that I couldn't even bring it back to glory
Take the darker side
And it's like the park at night
Then I rinse and I repeat until the sparks ignite
Through the dark and the light
And the bars that I write
You might even find me walking through the cars and

the bikes
I'm the plane in the sky
I look plain in disguise
And I aim for the right I'm the flame to the light
The sky is the limit
And you'll find me within it
There's a new world above where the mind isn't timid
The tale of the underdog
Never will I fuckin' stop
Try to make a rise just another one to drop

Now time to close
Because your minds have froze
And I'm gonna live my life in my mind, I know
That it's time for up-and-leavin'
I'm a fuckin' heathen
And that is how I leave it the world is uneven
Closing time,
One last call for alcohol
So finish your whiskey or beer
Closing time,
You don't have to go home
But you can't stay here
