I've seen a lot of things all through my days.
I've seen people laugh and I've seen them cry.
I've seen you wage war on a foreign land.
In the end you just do it for yourself.

I'd rather be starving than to stand beside you.
I'd rather be hurting than to stand beside you.
I'd rather be on the other side of the fence.

I may be young but I know what is right.
You may have all the money but I am richer than you.
I know how to love and I still have a soul.
All you have is your power and your greed.

I'd rather be starving than to stand beside you.
I'd rather be chained than to stand beside you.
I'd rather be on the other side of the fence.

I've seen a lot of things all through my days.
I've seen people laugh and I've seen them cry.
In the end it all comes down to one thing.
Weather I am with you or against.

I'd rather be starving than to stand beside you.
I'd rather be dying than to stand beside you.
I'd rather be on the other side of the fence.
