Every time we touch I fall in love
Every time we touch I fall in love
I know that time will kill us all
But every time we touch I fall in love

Every time we kiss I fall in love
Every time we kiss I fall in love
I know that time will kill us all

But every time we kiss I fall in love

Every breath you take I fall in love
Every breath you take I fall in love
I know that time will kill us all
But every breath you take
I'll make you fall in love
