Baby you know that I told you that I'm done with you  
There's no need to cry tears only drown you slowly  
Baby you know that I told you a million times to let me be  
Baby you know 'cause I , I told you to set me free

The more I try, the more I die  
The more we lie, the more we cry

Why we are staying, staying, staying (x3)  
Paving the way to your heart  
But we're always gonna break it

Take me away from here this madness is too much for me  
Was I a certainty I told you to set me free

The more I try, the more I die  
The more we lie, the more we cry

Why we are staying, staying, staying (x3)  
Paving the way to your heart  
But we're always gonna break it

When it's closed and blue  
And the heart has just turned cold  
It's all set and done  
When the love has turned to stone  
It's all set and done  
'Cause we just can't love no more

'Cause the more we lie, the more we cry, we cry, we cry, we cry

The more I try, the more I die  
The more we lie, the more we cry

Why we are staying, staying, staying (x3)  
Paving the way to your heart  
But we're always gonna break it
