Wow!

Said she could take me to a place made of gold
Where the moon is bright and the sun burns real slow,
yeah
And the air incensed with strawberries and sex
And sugar flies and honey runs wet.

Take me now, now
Take me now, oh

Said I've been holding on to a place that's so colder
And you're the only one that could make me let go
Infect me with your love chile, oh oh
Infect me with your love chile, oh oh
Be my pusher, be my lover, be my best friend like no
other, ohh
Infect me with your love chile, oh I, ohhh

Do it baby, do it now
Save me from a world tryin' to bring me down
I wanna love, I want your love chile.
