

## Omen

# "It's Not Easy"

Visit "[It's Not Easy](#)" on [MotoLyrics.com](http://MotoLyrics.com)

They stand as one in the night  
In broken bottle glass  
The tension's mounting higher  
As they prepare to rise  
Drawing near to the doors  
Screams are filling the air  
Anticipation's taking hold  
Enter if you dare  
It can change your life  
Turn you inside out  
Like a siren it calls  
There's no way out

Bright lights and flashing mirrors  
Lasers piercing glare  
High above you black columns hang  
Let them melt the air

[Chorus]  
It's not easy  
Scream it louder  
Cause we're taking down the walls  
It's not easy  
Stand or cower  
As we overload the halls  
It's not easy  
Cause the bridges have been burned  
Lessons have been learned  
C'mon, take a stand with me

You straggle in from off the streets  
The dreamers and the martyrs  
For this night is yours to keep  
And never meant for barter  
Rebel is your name at heart  
No other way  
And if outside they don't like your part  
We welcome strays

[Chorus]  
It's not easy  
Scream it louder

Cause we're taking down the walls  
It's not easy  
Stand or cower  
As we overload the halls  
It's not easy  
Cause the bridges have been burned  
And there's no return  
C'mon take a stand with me

Now the lights are gone  
You're standing all alone  
But we're still in your head  
You can't go home  
You don't wanna go home  
When you're caught in the night  
When you're caught in the night  
Yeah

[Chorus]  
It's not easy  
Scream it louder  
Cause we're taking down the walls  
It's not easy  
Stand or cower  
As we overload the halls  
It's not easy  
Cause the bridges have been burned  
And there's no return  
C'mon take a chance  
On me  
On me
