I need somebody, someone to hold me  
Just like I want to, just like you used to

I need somebody to hold my hand  
Just like you used to, just like you once did

What do you dream at night when the lights are out  
How do you feel in your heart (?)  
What do you see through your big green eyes  
I wonder if you dream at all

I need somebody that knows what I feel  
Who sees what I see, to be what will be  
(?), it's all I can feel,  
It's all I can see, it's all I can be

What do you dream at night when the lights are out  
How do you feel in your heart (?)  
What do you see through your big green eyes  
I wonder if you dream at all

(?) [x4]
