She says "Boy come on and take my hand,
I know you're scared but by this time tomorrow you will
be a man.

Follow me to the promised land,
And I'll take care of you the way no other woman can."

Oh, my revolution girl
I've been hypnotized by my revolution girl

She calls my name whenever I walk by
And when I stop to smile it always makes her cry
She gets so sad whenever I go home
She kisses me and begs me not to leave her all alone

Oh, my revolution girl
I've been hypnotized by my revolution girl
I became a man with my revolution girl
Every week I get my revolution girl

Love is now an urgency, it comes as no surprise
Every Friday night I die, and every Sunday rise

'Cause I found love on revolution boulevard
Her face is like an angel, and her body is a work of art
I found love across the borderline
She kept me safe and sound, and loved me til the
morning light.

My revolution girl
(X5)
