We're going back to Saturn

I wanna be better for you  
But look at the weather, its cold  
How can I be better for you  
If above your head it always snows

I take everything I need  
I leave everything else  
Cant be stuck with what Ive seen  
And now it all makes more sense  
If Saturn will return this year  
I cant be wasting my skin or head  
Cause theres no Club for my 27th

I wanna be better next year  
But look at the weather its cold  
How can I be better at all  
If above my head it always snows

Rainy days, Im leaving you behind,  
The doors aint holding me this time  
Snowy days, Im leaving you behind,  
Slam, slam! The doors aint holding me this time

I wanna be better next year  
But look at the weather its cold  
How can I be better at all  
If above my head it always snows
