"So This Is War"

Visit "[So This Is War](#)" on MotoLyrics.com

So this is war from the moment that i saw your eyes
catch fire
with the countless imitations of exploding skies, you
fire away
I've seen you before with my eyes closed suspended
on the starry skies
confusing shooting rocks for broken satellites to mask
all the pain

Is everything wrong? or were we right to feel this way
because we stayed to long?
Hearing Heavens army sing majestic songs to send
you away

It's okay because i'm shattered too
I know you looked away to enjoy the view
I know it seems to be the trouble is when you can't go
back
