Even the eyes of god must turn
Away from your pathetic prayer
Boy, lift yourself up
Man, stand the fuck up

Come set the world on fire, it burns
To match the blackness of your loathing
For your weakness, hidden, locked up
Again the walls rise up

This shell can never break
Nothing can ever tear it down
This shell can never break
Drink up the crimson rain
Just to see the world around you drown

With every breath you rot inside
The illusion can never ever die
You're ripping at the seam
With but your face left to redeem
OPEN UP!
Embrace your own indignation
(EVERMORE) one great (YOU ARE ONE) stoic
concealed restless lie

This shell can never break
I know it must remain
To hide the voices in my head
Unsung unsaid

Hear the song of silent suffering
A melody of trembling solitary shame
Join the song of silent suffering
A threnody to every tear without a name

So follow the rules of the game

The truth is festering upon your face
And you resent the blood that runs in your veins
Let vanity die and define
What you are and what you'll grow into
Shatter the mirror, free the reflection inside

Gone
Stillborn the soul
Fearing the light
Alone, here I lie
Take me away
Let me awaken again from this night
