Distant pathway parallels
Revelations in the unfound
I'm scouring all these eyes can see
A warrior of truth i'll be
unraveling walls of belief
for answers behind veils of deceit

The restoration of a fallen humankind
The power that resides inside our minds
I search the oceans of my soul to find
What I once left behind

Reawaken to tread the path of deceit that now lies
ahead of me
To turn every last stone
No regret for the damage done, find the truth within
the lies and bloodshed
Unearth the unknown

See the standing armies
Of my hopelessly misled
I know that war is mine to bring
Peace
Is obsolete
The road to truth
Is paved with suffering

The restoration of a fallen humankind
The power that resides inside our minds
I search the oceans of my soul to find
What I once left behind

Reawaken to tread the path of deceit that now lies
ahead of me
To turn every last stone
No regret for the damage done, find the truth within
the lies and bloodshed
Unearth the unknown
