Come, sleep, nothing is changing  
I'll be right here by your side!  
Great teens, colors fading  
In the stillness of the night!

You're... but it seems  
You're hiding in daydreams  
Can't found our way to the light!  
And... and reunites and we can  
We'll see daylight through the blinds.

Chorus:  
Drifting in the cold space, the glory... all day  
Body slack... the hour in your eye  
Fingernails and cold skin, your parents bed laying  
... stretch emptiness, and space you left behind.

Go, sleep nothing is changing  
I'll be right here by your side  
Tell the... we're not aging  
Beneath these trembling star... skies

You're thick skin, but you know  
It's beyond the control  
Shadows gleaming through our eyes  
We're living the past, dear  
We're free from those dark years  
We'll see daylight through the blinds!

Chorus:  
Drifting in the cold space, the glory... all day  
Body slack... the hour in your eye  
Fingernails and cold skin, your parents bed laying  
... stretch emptiness, and space you left behind.

Oh, oh, oh  
Oh, oh, oh  
Oh, oh, oh  
Oh, oh, oh
