

## Mesita "Somewhere Else"

Visit "[Somewhere Else](#)" on [MotoLyrics.com](https://MotoLyrics.com)

living life in three-month-long stories  
moving on from one to the next  
when you think you finally know me  
i have become somebody else

need to leave behind this worry  
just can't seem to rest my head  
when i think i'm finally settled  
i am headed out somewhere else

living life in three month-long stories  
wanderlust has taken hold  
still young, i see a world wide open  
still need to find somebody else

need to leave behind this worry  
just can't seem to rest my head  
when i think i'm finally settled  
i am headed out somewhere else

abandon when abandoned  
so you leave before you are left  
i've never really known who i am

hope these days will have some meaning someday  
but for now i'm just a stray with a suitcase
