Nothing can stop  
Emotions  
That run down the sides of your face  
Wish I could change this moment to  
Another time and place

Nothing you say can move  
Me  
I've chosen the road that I'm on  
I have to join the fight for freedom  
Until the war is won

Chorus:  
We will keep the faith between us  
If we only try  
We will keep the truth inside us  
Love will never lie

Someone will always hear  
You  
Care about you when you cry  
But no one can hear my heart is breaking  
As I say goodbye

Chorus:  
We will keep the faith between us  
If we only try  
We will keep the truth inside us  
Love will never lie

But even though the  
Cold from your still beatingnd even though the cold in  
your eyesmakes me freeze all the  
Time
