Drivin southbound - Through the small towns
Little churches - Front porches all around
Changing seasons - Moonlit cotton fields
All this scenery - Only makes me feel

Like we are still together - And you are here with me
But I just keep on movin - With every mile

I see you everywhere - In everything I do
Wanting to be with you - Knowing that your not there
I'd give it all away - To have just one more day
If I could have you here - I see you everywhere

Across the water - Down at the beach
In New York City - Wherever I might be
Our time together - Seems like yesterday
At any moment - I can see your face

I want to be together - and have you here with me
No matter where I'm headed - With every mile

I see you everywhere - In everything I see
Wishing that you could be - Knowing that your not there
I'd give it all away - To have just one more day
If I could have you here - I see you everywhere

I want to be together - And have you here with me
But I just keep on movin - With every mile

I see you everywhere - In everything I do
Wanting to be with you - Knowing that your not there
I'd give it all away - To have just one more day
If I could have you here - I see you everywhere
