June

When you come and go, I know that's not your fault.  
"My city loves your destination to darkness."  
"When they touch and stare and no one says"  
Your talent fails to love all of their absence"  
"No one else could dance like you when you're drunk  
(Arctic will come down)."  
"Green and yellow cops will  
drop your car , pay them and keep going."

When you shrug and fall you see so many colors, you  
see so many commons to hide from your parents.  
Maths and C.e.i.d will say "What a distraction? That's  
not the man I could trust for my school.Damn!"  
Hate your whiskey jokes when they're not close, Leave  
them and Fall down.  
Write your songs at papers they will  
throw.."  
"Water saved me, lights betrayed me,  
Indie said it's not our fault.
