All the streets are dark and empty
They've been drowned by heavy rain
I have walked around for hours
Though I know it is in vain
I can't get you out of my head
And I'm frozen to the bone
You've become my true obsession
You Will Never Be Alone

Never realized or knew what
Unrequited love could do
I feel just like a vampire
Who wants every drop of you
And I feel like a werewolf
When I'm silent on the phone
I don't tell you who I am but
You Will Never Be Alone

But every time we meet
I seem so cool and confident
And we spend every single break
At work together
You always tell me all about
The women that you've met
Why don't you see that
We're birds of a feather

When you're near me I still act
In a very normal way
But when working days are over
I can't control how I behave
I know I will make you happy
And that I need you on my own
Love me or be persecuted
'Coz You'll Never Be Alone

Call me insane, baby
But You Will Never Be Alone
