Verse

Things in my life have all turned to dust
Broken down, come undone
Recalling the words that you said to me
"You can't stop once you've begun"

PreChorus

Don't lose sight of what is wrong and what's
right
When darkness prevails you must look to see the light

Chorus

Hold On Hold Tight
You know you've got to make it through the night
Hold On Hold Tight
If the nights are dark then the days will be bright
Hold On Hold Tight
and everything will be alright

Verse

A life without fear, hate, or regret
is not going to happen to me
Chasing a dream, this feeling I see
There's nothing more I'd rather be

PreChorus

But there's time to break free and change your
mind
When life gets too hard and the pain makes
you go blind

Chorus

Hold On Hold Tight
You know you've got to make it through the night
Hold On Hold Tight
If the nights are dark then the days will be bright

Hold On Hold Tight
and everything will be alright

Bridge

Try but you can't escape it
a thought says you should embrace what you can not
change
Feeling a sense of relief
in all you've got to believe in

PreChorus

Now and then you've got to fight till the end
When left all alone and there's no one to call a
friend

Chorus

Hold On Hold Tight
You know you've got to make it through the night
Hold On Hold Tight
If the nights are dark then the days will be bright
Hold On Hold Tight
You know you've got to make it through the night
Hold On Hold Tight
If the nights are dark then the days will be bright
Hold On Hold Tight
and everything will be alright
