

New Victorians "Chemicals"

Visit "[Chemicals](#)" on MotoLyrics.com

My thoughts, the fears
Blind eyes, no ears
I can't remember anymore

Back and forth I swing off course
I just need something to keep me off the floor

Chorus
Chemicals to take away the fears
Chemicals to chase away the tears
But the chemicals are all just smoke and mirrors
It's what I feel, it's what I fear

Anxiously, I wake from sleep
I dream about you, we are alone again in the rain
A wretch without you and I can't be with you again

Chorus
Chemicals to take away the fears
Chemicals to chase away the tears
But the chemicals are all just smoke and mirrors
It's what I feel, it's what I fear

If I was made how I was meant,
then who can make straight what God has bent

It's hard to feel pain or pleasure when all your
responses are measured away

Chemicals to take away the fears
Chemicals to chase away the tears
But the chemicals are all just smoke and mirrors
It's what I feel, it's what I fear
