"Before We Say Goodbye"

Visit "[Before We Say Goodbye](#)" on MotoLyrics.com

i used to ask people
how can you be with someone
when you know you're gonna break up eventually
you would think i can take my own advice right
you feel like separation is inevitable
but i just can feel i can keep my distance
and it's killing me to talk about is so

it's conversation i put it
you keep bring it up
you feel like .. wish for
can't get me enough
so let me suggest you
cause i can have you walking out at the door
and .. like i have it all .. bring you up
real talk is unfortunately that i met you know
cause you and .. ideal of a woman i spent my life
once i felt ready to settle down
ten years in to the future i would have put a ring on it
without a doubt
but right now i must say this to survive
upon the most critical influential times of our lives
to inspire and motivate it .. drop you later
tripping on success with no insurance that i will get to ,
it's truly because i am scared of what i am meant to be
considering
what i must give up when i get the chance to be that
, before we say goodbye let's act

chorus

all my hold my hand
when time is frozen
understand
if i leave my heart it open
you got just what i need
but the same time you gotta go
we should make the most of us
before we say goodbye

light the sky up every time that we make love

sunset view is your face when we make up
even though you are moving on collage teams right
can you please help me pretend like forever is tonight
yeah you know the campus is in my scene
i just hope you are careful and i show up in your
dreams
every now and then but now would be preferred
if we share the same heart beat i promise you would be
preferred

the question body is holding us accountable
we have been searching for that spark and its ..
i am scared to see you leave first ,
no relation what we need to share ..
please don't stop loving me a bit

chorus

all my hold my hand
when time is frozen
understand
if i leave my heart it open
you got just what i need
but the same time you gotta go
we should make the most of us
before we say goodbye
