I declare the end to this endless war
Which is all that's known to me
You came just in time
Showed me through enemies line
Gave me my own destiny

And every single chance I took was worth it
Cause I know that your timing is perfect
And every step I take gets me closer
Just know I wont stop till its over

Hey, Hey, Age is just a number
Let's keep the party going till the end of time
We're singing
Hey, Hey, Age is just a number
Let's keep the party going till the end of time

We can dance all night
Throw our names up in lights
Got the rhythm on our side
Nothing will stand against us

(We're singing)
Hey, Hey, Age is just a number
Let's keep the party going till the end of time

I'm not worried of what the future brings
I've given up and let go of all these things
No longer buying time, never turning back
I'm past the point of no return

Don't worry about tomorrow
For tomorrow will have it self
Let's keep the party going
Until the end of time
