Consider creating an altered dimension  
Grasping the greatness of synthetic space  
Cursed by collective conclusions in tension  
Holy assassins leave no moral trace

Ready for initialization commands?

Crude memories of once diseased  
Time after time the core is increased  
Victims (Losers) - had it coming  
Now: My friend, look who's running

Fetch a figure out Who will be next (?)  
Burn the environment still stands erect  
Strong beats stronger - strongest a coward  
Will to power machinery hour

Determination demanding destructive action  
"I have a vision" - What's your reaction?  
Show me, don't tell me - we're in this together  
Fight for the birds of a feather, forever

Nude memories of once released  
Time after time the core is increased  
Victims (Chosers) - had it coming  
Now: My friend, look who's running

Junkie spirituals, the tension diseased  
Spiritual junkies, we all feast

Ready for initialization commands.

Create a break before it's too late  
Don't hesitate to fake the bait  
No guilt - no confession, when cornered you kill  
Love under will is The law is The thrill.
