Who wants to fly ought to know how to fall  
- it's not hard at all but don't start from too high.  
We see the truth so it's hard not to lie.  
I want to know why you can't take my call

Chorus: and it's wise not to stay where you're put  
When the ground does burn underfoot.  
And it's important to know the mystics  
But yet more to study ballistics  
And so take to the skies!  
Take to the skies!

Who's got the cue, who makes me do as i like?  
Stay below radar, i think i'll just walk.  
Where is dersu, where's the end of all talk?  
It's in your hand, it's a pleasure to hike.

And it's all but a game  
To the thugs on the go.  
What is up we don't know  
But we know who to blame.  
Every day it occurs,  
And we fawn to the strong.  
I thought nothing was worse  
But i was wrong.

And i want you to be  
On the top of the sky  
With the pigs in the sty  
And the stern gang and me  
And i told all the wise:  
Just to fly, not to fight  
No it's never that nice  
And i was right.

Chorus: and it's wise not to stay where you're put  
When the ground does burn underfoot.  
And it's important to know the mystics  
But yet more to study ballistics  
And so take to the skies!  
Take to the skies!

Just the cush-cush-cush-cush  
Just the cush-cush-cush.  
Just the cush-cush-cush-cush  
Just the cush-cush-cush.
