I know it was never easy
Nobody was on your side
Back home where the girls were mean and the boys
were high
You'd hear about every party
But you'd have to invite yourself
You'd sit spending the whole night wishing you were
someone else

Living on the outside
Like you never was in
You took your chance with both your hands
And baby you showed them

Look at your life you're like a diamond
Look at you shine from inside out
Maybe you took your time to find it
Oh, but look at you now
Oh and I never saw it coming
It hit me like lightning from a cloud
Whatever it was that you were hiding
You found your way out
And look at you now
Look at you now

A shy girl afraid of the water
Now you're leaving them in your wake
So you fell down seven times but you got up eight
Though I hardly recognize you
Standing face to face
You're just a like a butterfly that's finally come of age

Look at your life you're like a diamond
Look at you shine from inside out
Maybe you took your time to find it
Oh, but look at you now
Oh and I never saw it coming
It hit me like lightning from a cloud
Whatever it was that you were hiding
You found your way out
And look at you now

Look at you now

And seeing you across the street
You almost knocked me off my feet
It's been so long I can't believe it's true, it's you

Oh and I never saw it coming
It hit me like lightning from a cloud
Whatever it was that you were hiding
You found your way out
And look at you now
Look at you now
Look at you now
Look at you now
