They told me you can't understand
Until you're holding in your hand
The greatest joy that life could ever bring

Little hands and little feet
The purest heart that ever did beat
And the bluest eyes that you have ever seen

Oh our love is bigger than the two of us
Our love is more than just the sum of us
It's hard to believe only yesterday
It was just you and me
Now one plus one equals three

Everything they said was true
It's the wildest ride with the greatest view
It's the missing piece that you've been waitin' for

The days are long and the nights are shattered
But somehow none of that stuff matters
Cause life is so much sweeter than before

Oh our love is bigger than the two of us
Our love is more than just the sum of us
It's hard to believe only yesterday
It was just you and me
Now one plus one equals three

It's hard to believe only yesterday
It was just you and me
Now one plus one equals three
Yeah one plus one equals three
