"Thank You Angels"

Visit "[Thank You Angels](#)" on MotoLyrics.com

She was running every red
When the blue lights flashed and stopped her
Screaming like she's crazy
My baby needs a doctor
And I don't know what else to do

30 seconds later
They were flyin' through the city streets
Nurses on the phone, traffic
Partin' like the red sea
They made it just in time
She fell to her knees and cried

Thank you angels
Oh, thank you angels
For the light, for the love
For the not giving up
For the faith and the fight
For just standing by my side
For the hope and belief
For the little things nobody sees
Oh, thank you angels
For watchin' over me

He was pickin' up the pieces
Of what was left of nothin'
Everything they worked for
Destroyed in just a moment
They never saw it comin'

But help flew in from nowhere
Just like an answered prayer
First it came from family
Then it came from everywhere
Small towns stick together
And angels don't just live in heaven

Thank you angels
Oh, thank you angels
For the light, for the love
For the not giving up

For the faith and the fight
For just standing by my side
For the hope and belief
For the little things nobody sees
Oh, thank you angels
For watchin' over me
For watchin' over me

We don't say it enough
We get so caught up
In ourselves
So thank you angels
Thank you angels
Oh, thank you angels

For the light, for the love
For the not giving up
For the faith and the fight
For just standing by my side
For the hope and belief
For the little things nobody sees
Oh, thank you angels
For watchin' over me

Yeah, thank you angels
For watchin' over me
