

O.S.I. "1 Cold Call"

Visit "[1 Cold Call](#)" on MotoLyrics.com

"Somebody, want to be wanted. This station has interrupted its broadcast at the request of the United States government, to participate in the emergency broadcast system, serving the fort Wayne area. W.O W.O. received this emergency announcement just moments ago, we have to verify, we did verify with a special message and code, and this is an emergency action, directed by the emergency network and directed by the president. W.O.W.O. will remain on the air in the Ford Wayne area, to broadcast any emergency information that is coming in. At this point, at the microphone, I know of nothing to cause this, we are waiting from Steward Dan in the W.O.W.O. news room to bring us some information from any of our wired services. We have been asked to broadcast this emergency information immediately, we will bring you other emergency information the moment we receive it."

Cold call, cold call

Pray to a higher power
Enemy is gonna do the same
You make energy matter
Universe doesn't know your, know your name

Cold call, cold call
Enemy is gonna do the same
Cold call, cold call
Universe never heard of us

Enemy is gonna do the same
Universe never heard of us

Ooh, light those candles
colour up the house if you don't know how
Ooh, sang that stanza
get it all in before the music stops

Cold call, cold call
Enemy is gonna do the same
Cold call, cold call

Universe never heard of us

I guess I'm fine but my neighbours could be better
I drank that wine and I got my reference letter

Who will they come for?
I wanna see you there

Emergency broadcast
"Please do not call to ask what is the matter, we do not know. We have to wait for the official notification. We invite you to stay tuned, and we will send it as it is received. So please please do not call us about what is the matter. We are endeavouring to find out ourselves."

Cold call, cold call
Enemy is gonna do the same
Cold call, cold call
Universe never heard of us

Enemy is gonna do the same
Universe never heard of us

Cold call, cold call

Emergency broadcast
"Now this information is just in. It says ATMT, advises the AP that the airforce put the wrong message on tape. If you think this hasn't been something here at the studio..."
